

AUTOCAB® FX

The AutoCab® has been designed to provide secure access to over 200 different items using a variety of drawers, shelves and dividers. The assortment of storage module sizes make managing both small and large MRO, PPE, and many other items a reality (carbide inserts, drill bits, spray cans, tape, safety glasses, air tools, welding tips, solder and more!)

The system can also control access to products by item, employee or job. Unlike many point-of-use dispensing machines, the AutoCab® manages issue and return transactions of both fast and slow moving items while eliminating the need for individual repacking of items.

HOW IT WORKS

1. Login – Employees access the AutoCab® by using their employee badge or by entering their employee number. For additional security, require fingerprint validation.

2. Select Item – The user selects the item they want and the appropriate door will open.

3. Take – The user can take as many items as needed using the “take” and “return” item buttons inside the cabinet. Closing the door completes the transaction.

Optional: A PIN can also be required as well as prompts to track overhead data like Department Number, Job, Number, Customer Number, Tail Number, etc...

FEATURES

- 24-7 Availability - With security and accountability
- Secured doors and compartments - Provide medium level control
- Automates purchase orders
- No need to repackage items!
- Easy to re-configure
- Clear doors provide visibility making supplies easy to find
